PROJECTS

PROJECT-1

FOOD-ORDERING-WEBSITE LINK

(JAVA | SPRING BOOT | JSON WEB TOKEN | MYSQL | JAVASCRIPT | REACT | AXIOS | REDUX | TAILWINDCSS | MUI | STRIPE PAYMENT GATEWAY)

- Developed a robust full-stack web application for online food ordering, encompassing user authentication, menu management, order processing, and secure payment integration
- Using Java Spring Boot for backend services, MySQL for efficient data storage, React for dynamic frontend, and MUI for UI component library to deliver a seamless user experience.
- Implemented JSON Web Tokens (JWT) for secure authentication, Redux for state management, and Axios for efficient API interactions, ensuring a scalable and reliable system.
- Integrated Stripe payment gateway to provide secure and convenient payment options for customers, enhancing user satisfaction.
- Utilized Tailwind CSS for rapid UI development and ensured optimal user experience across different devices through responsive design principles.

PROJECT-2

ECOMMERCE MOBILE STORE WEBSITE LINK

HTML | CSS | JAVASCRIPT | REACT | BOOTSTRAP | STYLED-COMPONENTS

- Developed a responsive eCommerce mobile store website using HTML, CSS, and React.js, ensuring cross-browser compatibility and optimal user experience across various devices.
- Leveraged Bootstrap for rapid prototyping and Styled Components for efficient styling, enhancing the website's aesthetics and maintainability.
- Implemented dynamic functionality such as product listing on the homepage, interactive cart management, and detailed product pages with dynamic content rendering, enhancing user engagement and satisfaction
- Utilized Git for version control
- Deployed the website in Netlify, ensuring continuous integration and deployment (CI/CD) pipelines for seamless updates and maintenance.
